

IMPROVED QUALITY SUPPLY FROM CAMIDA

This is to inform you that Camida are substantially upgrading our vendor approval system – especially with regard to vendors from overseas locations including China and India.

You may be aware of, and already utilise, our Pharmaceutical Exotic Supply Procedures (PESP) which include a Pre Audit Document (PAD).

This, along with other elements of the Camida Quality System, helps us ensure a consistent high level of product supply from around the world.

In addition, we have now employed the services of a GMP Auditor to create a new Quality and SHE (Safety, Health & Environment) Audit procedure for our vendors.

In the future, all manufacturing plants in India and China from which we purchase on your behalf, will undergo a mandatory audit within our Vendor Approval Procedure. We have committed to have this in place by June 2010.

Of course this is just one aspect of the high level of supply to which we aspire.

In addition to the above mentioned Mandatory audit of plants (which will be shared as required with our customers)

We also provide:

Full

- **GMP compliance by Good Trade & Distribution practice (GTDP)**
- **REACH (pre) registration for all products supplied**
- **RESPONSIBLE CARE supply utilising ESAD II**
- **CLP compliance via our inspection of overseas goods for labelling and packaging**

We will inform you in detail as implementation of this Audit upgrade progresses.

Please continue to expect a high quality fully compliant Global supply of Specialised Chemical products from Camida – and please continue to request information concerning any aspect of our supply or that of our vendors.

*Camida don't restrict information
We provide it!*
